DETAILED ACTION

Drawings

1. The drawings are objected to because Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by the applicant's admitted prior art of figures 1-5.

Claim 7: the applicant discloses in the section of the specification entitled "Background of the Invention" prior art that consists of a drive controller for brushless

Art Unit: 2837

motors comprising a first switching element connected between a first power supply and the output terminal of the drive controller (e.g. Figure 1, Item QUH), a second switching element connected between the output and a second power supply (e.g. Figure 1, Item QUL), oscillator means (e.g. Figure 1, Item 13), position signal generation means (e.g. Figure 1, Item 14), and comparator means (e.g. Figure 1, Item 16); the first and second switching elements being fed with PWM signals (e.g. Page 3, Lines 14-20).

Claim 8: timing means for regulating the time interval of the respective PWM signals (page 3, lines 8-11).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6710572.

Although the conflicting claims are not identical, they are not patentably distinct from each other because They both teach a drive controller for brushless motors comprising

Art Unit: 2837

a first switching element connected between a first power supply and the output terminal of the drive controller, a second switching element connected between the output and a second power supply, oscillator means, position signal generation means, and comparator means; the first and second switching elements being fed with PWM signals.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They are Tajima et al (US 5,882,572), Ashikaga et al (US 4967135), and Kim (US 5278486).
